

The ticketing that also runs the till and the accounts.

Online sales, point of sale, access control and accounting in a single software, for leisure facilities.

Four tools that don't talk to each other.

Online ticketing

One provider, its fees, its export.

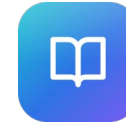

Point of sale

Another software, more prices to maintain.

Access control

Turnstiles that ignore sales.

Accounting

Revenue re-entered every month.

Result: re-keying, cash discrepancies to explain, tax compliance that is hard to prove.

WITH FLUVIA

A single chain, from sale to accountant.

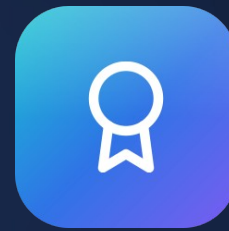

Sell

Online or at the till, same prices

Check

The QR ticket opens the right door

Seal

Every sale NF525-chained

Record

Entries and FEC with no re-keying

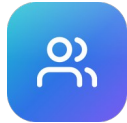

TICKETING

The right price, at the right time, without overselling.

Seasonal pricing

Summer, winter, all year: the current season prevails.

Income-based pricing

A price based on household income, applied automatically.

Slots and capacity

A spot sold only once, even across two counters.

One product, several prices

Adult €4.50

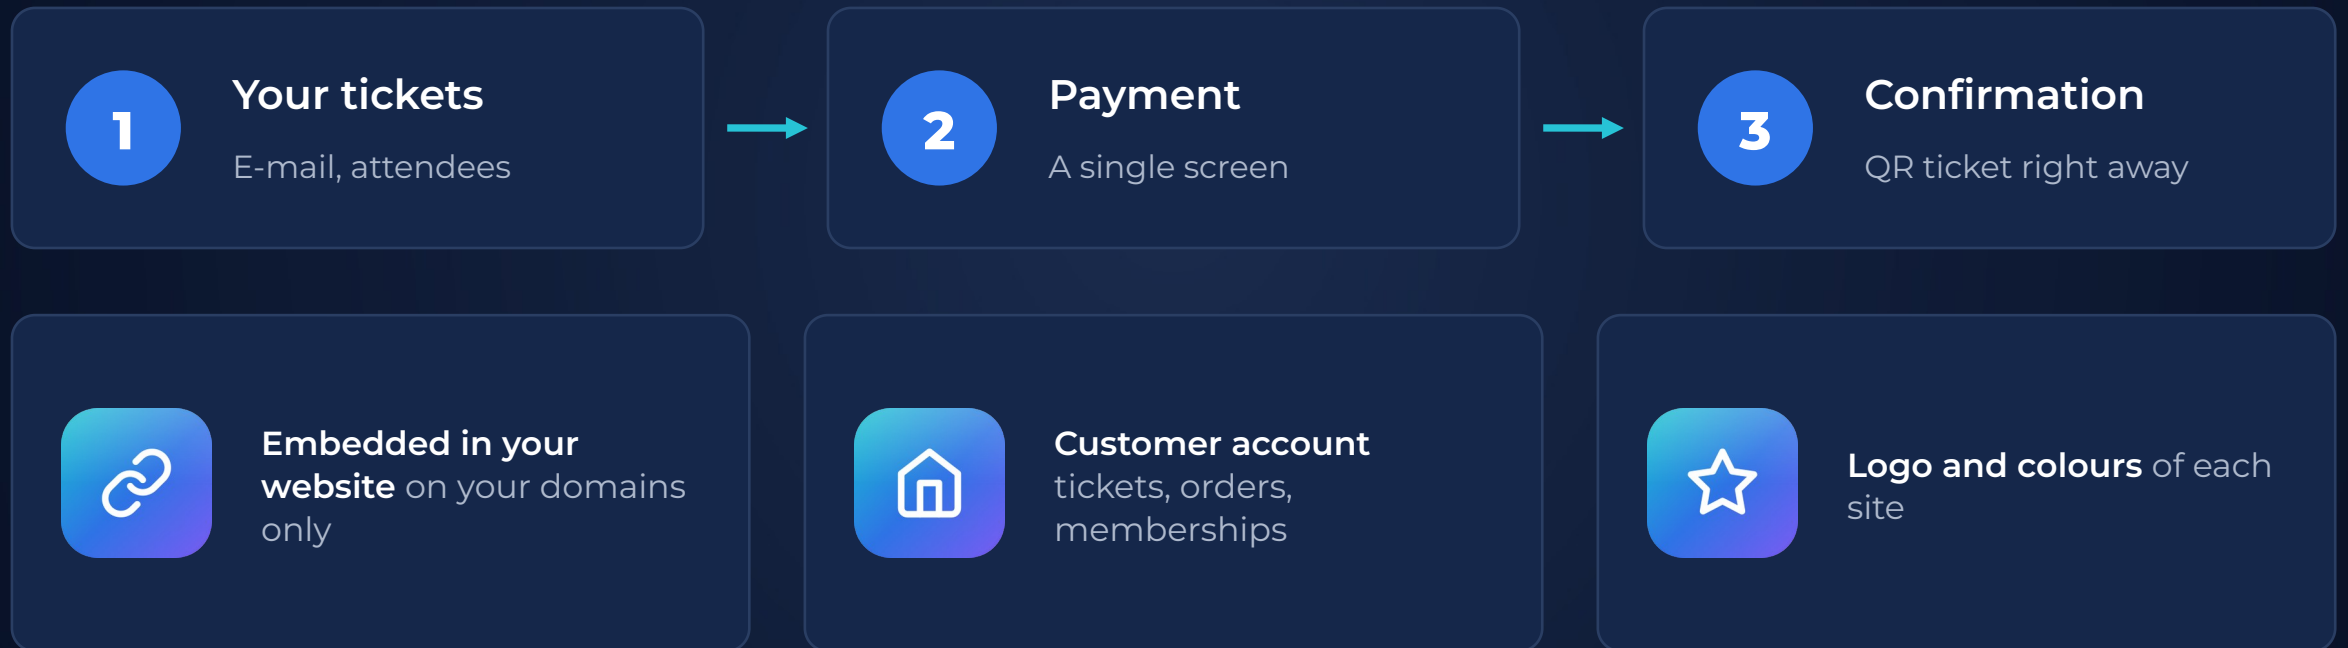

Child €2.80

Senior €3.00

Resident €3.50

ONLINE SALES

Your shop, in your website, in your colours.

POINT OF SALE

A fast counter, a close-out that balances.

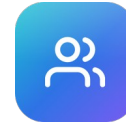

Counter sales

Tickets, cards, items in a few taps.

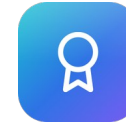

Z close-out

The cash counted, the discrepancy explained.

Memberships

Sign-up and SEPA mandate on the spot.

Sealed tickets

NF525 chaining, nothing can be erased.

The same products and prices as online: **reception sells, the office closes out, the accountant receives.**

MEMBERSHIPS AND CARDS

Build loyalty, without chasing payments.

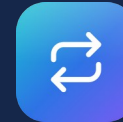

Memberships

Monthly or yearly, at the counter or online, commitment and cancellation tracked.

Multi-entry cards

Buy 10 get 12, with validity.
Rechargeable, deducted at each entry.

SEPA direct debit

Mandate, due dates, notices, rejections tracked through to recovery.

The membership or card becomes an **access right**: the turnstile knows who may enter, and how many times.

ACCESS CONTROL

The ticket sold opens the right door.

QR checked

The verdict shows with its reason:
already used, wrong zone, outside slot.

Live capacity

Real-time attendance, to keep within
the venue's capacity.

Standalone readers

A network outage doesn't stop entry:
readers keep the rights.

Each product states which zones it opens: **pool, hall, changing rooms**. No zone, no door.

ACCOUNTING

The accountant receives entries, not tickets.

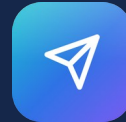

NF525

Sales, invoices and entries chained.

FEC in one click

The tax authority's file.

Factur-X

The e-invoicing format.

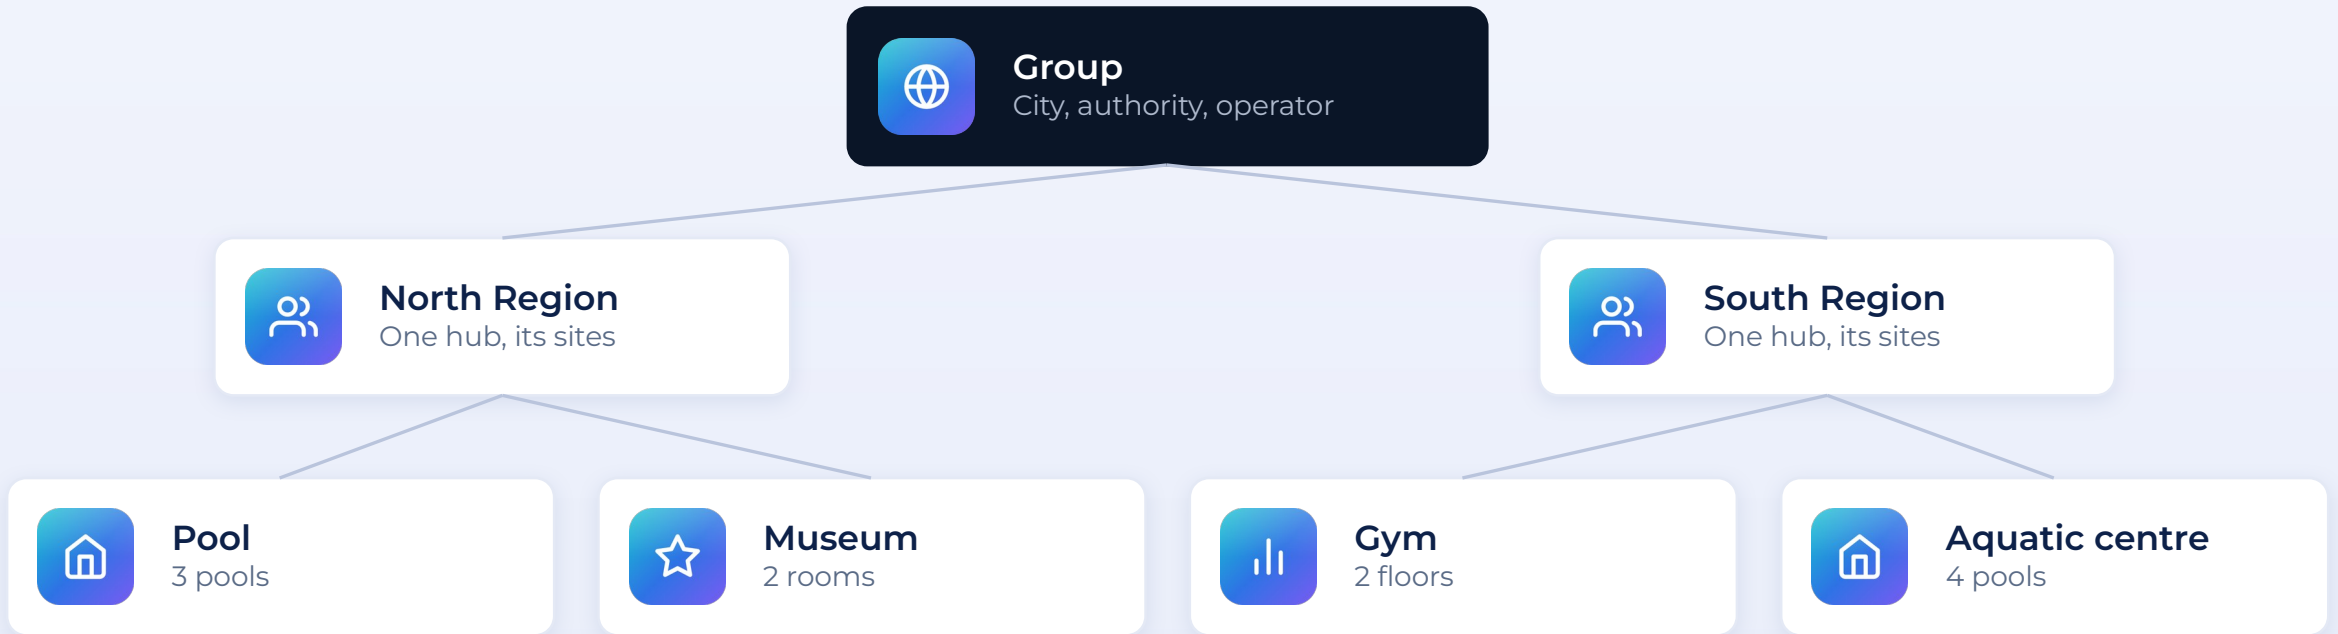

Deferred income

Memberships spread over their period.

Every sale produces its entry, **on the right account and with the right VAT.**

One network, each with its own scope.

Let's see it on your facility.

A demo with your prices, your products and your shop, in 30 minutes.
